

UniCel DxH Slidemaker Stainer - Handling Torn Ribbon

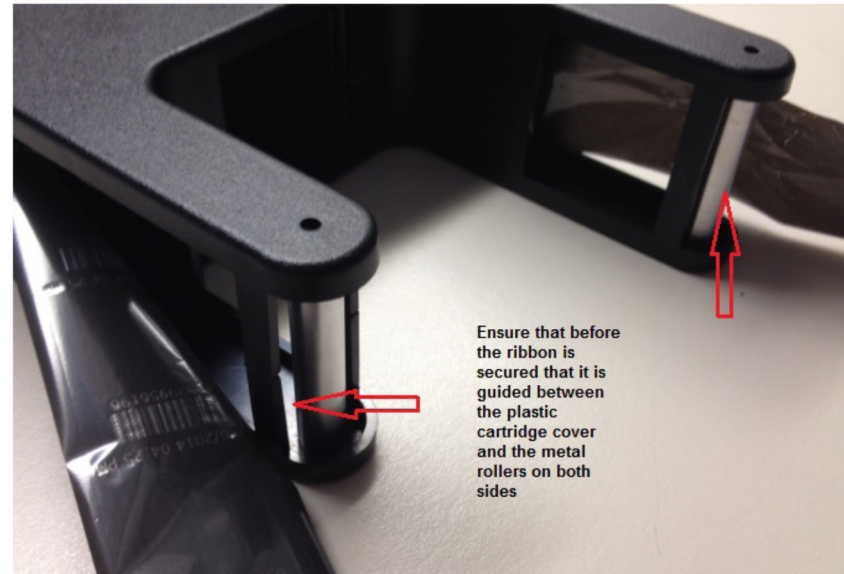

- 1 Attempt to repair the existing cartridge printer ribbon with adhesive tape.

Note: *If not repaired correctly the ribbon could continue to break more frequently.*

- 2 Ribbon must be between the plastic cartridge cover and metal rollers

Note: *Ensure that before the ribbon is secured that it is guided between the plastic cartridge cover and the metal rollers on both sides.*

Ensure that before the ribbon is secured that it is guided between the plastic cartridge cover and the metal rollers on both sides

3	Route the ribbon correctly between the metal rollers and the guides on the cartridge cover.	
4	Re-install the printer (follow the procedure in the IFU Instructions for Use manual. Chapter 13 > Replacing the Printer Ribbon or Cartridge > Replace the printer cartridge.
